 Climate change Billions of dollars get spent every year on climate change research-whether trying to understand the causes of climate change or trying to find ways to mitigate its effects.
 Jota metric Biodiversity Biodiversity is a multidimensional concept that encompasses a wide range of biological diversity.
 Jota metric 'Generate' Biodiversity shortfalls and taxonomic diversity: A review of the literature.
 Biological waste recycling has recently attracted widespread interest and investment.
 squisa SCOPUS\Textos Buscadora collectives in Mexico: A review of the literature.
 By bringing the social dynamics in cities to the surface, rhythm analysis offers a new way of understanding the city.
 By way of combining insights from the emerging geosocial literature and feminist theory, this article explores the role of the city in the production of social space.
 Jota metric Caring through Care is a political and ethical endeavor.
 squisa SCOPUS\Textos Care is a slippery word. Any attempt to define it is bound to fail.
 squisa SCO architecture Care offers a framework to shift the focus of architectural research from the individual to the social.
 Climate change appears to act as a metanarrative of concern linking different scales of analysis.
 squisa SCOPUS\Textos Coastal protection measures are being implemented in many coastal areas.
 Indian Ocean Commonly seen as either dangerous or unsocial, reptiles represent a kind of ambivalence.
 Jota metric 'Generate' Communities and individuals have a role to play in the development of the city.
 Jota metric housing compassion Compassion in urban settings is a new way of thinking about the city.
 squisa SCOPUS\Textos Composting is a material labor with a political dimension.
 squisa SCOPUS\Textos Considering the worsening climate change, the need for a new approach to urban planning is evident.
 squisa SCOPUS\Textos Container aquaculture — a method for the production of aquatic animals in containers.
 Cluster analysis Context: Climate variability plays a fundamental role in shaping agricultural output.
 squisa SCO alternative CONTEXT: In response to growing concerns about the impact of climate change on agriculture, a number of alternative approaches have been developed.
 squisa SCO Sweden; d Context: In Sweden, 34% of herd animals are kept in outdoor conditions.
 Agricultura Context: Nova Aliança has been industrializing the production of grapes by 41% in the last decade.
 Civil society Critically assessing growth-based models of innovation policy, this enlightening book offers a new way of thinking about the city.
 Decolonising methodologies continue to be critically developed to disrupt the dominant ways of knowing.
 Departing from debates in the 1980s among feminist Marxists in Germany and the United States, this article explores the role of the city in the production of social space.
 belowground Despite soil's vital ecological importance, its significance as a belowground trigger for climate change is often overlooked.
 squisa SCO Deforestation Despite the growing concerns related to deforestation, the rate of deforestation is still increasing.
 squisa SCOPUS\Textos Despite their key importance for the environment, the effects of deforestation on the climate are often overlooked.
 Determining brain tumors from MRI scans.
 Dirt is evoked to signify many important facets of mountain bike culture, including its role in the construction of the self.
 Domain ontology of crop pest control consists of hierarchically structured biological knowledge.
 squisa SCO Animal Welfare Drawing on collaborative ethnography, this article explores the role of the city in the production of social space.
 Drawing on data from an ethnographic study of urban agriculture in Massachusetts, this article explores the role of the city in the production of social space.
 Drawing on data from an ethnographic study of urban agriculture in Massachusetts, this article explores the role of the city in the production of social space.
 squisa SCO knowledge Drawing on ideas from the history of science, this article explores the role of the city in the production of social space.
 Drawing on the emerging field of multispecies justice, this article seeks to understand the role of the city in the production of social space.
 squisa SCO Chromatography Due to the ongoing environmental changes, the need for a new approach to urban planning is evident.
 Jota metric 'Generate' Ecosystem restoration initiatives are being implemented in many areas.
